

COMMUNITY TRAILS MASTER PLAN

The Draft Community Trails Master Plan (CTMP) represents the first planning document of the County Trails Program. The scope of the draft CTMP includes the unincorporated areas of the County of San Diego. While the plan provides an overview of the whole County Trails Program, its main focus is on development and management guidelines that can be applied to community level trail systems.

The CTMP had its origins in September of 2000, when the San Diego County Board of Supervisors affirmed that non-motorized trails outside of County parkland and road rights-of-way are a legitimate and necessary form of public recreation that the County should provide. In July of 2001, the Board of Supervisors gave direction on how to structure planning documents and major trail program elements with the goal of providing regional and community trails that meet the needs of County residents.

The CTMP is community-based, encourages community involvement, and allows each community to customize its plan to the unique characteristics, desires, and vision for local trail networks in its area. The 17 participating communities in this CTMP have reached a consensus on the importance of recreational trails in their area and have expended considerable effort in formulating community trail plans.
